

Charts

Classic Nano
Ideal for macro photography, a precision color reference for the tightest or most close up shots.

Classic Mini
Designed for on-the-job convenience, offering users a flexible solution for situations where a more lightweight color chart is required.

Classic
The original ColorChecker, designed to deliver true-to-life color reproduction giving photographers and videographers complete control.

3-Step Grayscale
A white, gray and black target card to make color adjustments and grading faster and easier with photo processing or video editing software.

White Balance
Scientifically engineered to provide a precise, uniform surface that is spectrally neutral in any lighting condition.

Gray Balance
18% gray reference scientifically engineered to provide a uniform spectrally neutral surface in all light conditions.

Passport Photo 2
Combining 4 targets and camera calibration software to deliver the most professional-quality color control possible.

Digital SG
Semi-gloss reference target for creating scanner and camera ICC profiles

Passport Video
Combines 4 video production targets- color primaries, white balance, 3-step grayscale, and focus- into one pocket-sized protective case.

Video
Two-sided target providing chromatic color chips, skin tone chips and gray reference chips on one side, and a spectrally neutral white balance target on the other side.

Recommended for	Photographers and Bloggers								Filmmakers	
Why do I need it?	Use as a reliable color reference target during the shoot and ensure captured colors are correct. Saves you time in photo/film shooting and editing & ensures predictable color output.
