Classic Nano

Ideal for macro photography, a precision color reference for the tightest or most close up shots.

Classic

The original ColorChecker, designed to deliver true-to-life color reproduction giving photographers and videographers complete control.

3-Step Grayscale

A white, gray and black target card to make color adjustments and grading faster and easier with photo processing or video editing software.

White Balance

Scientifically engineered to provide a precise, uniform surface that is spectrally neutral in any lighting condition.

Gray Balance

18% gray reference scientifically engineered to provide a uniform spectrally neutral surface in all light conditions.

Passport Photo 2

Combining 4 targets and camera calibration software to deliver the most professional-quality color control possible.

Digital SG

Semi-gloss reference target for creating scanner and camera ICC profiles.

Passport Video 2

Combines 4 video production targets - color primaries, white balance, 3-step grayscale, and classic target for video or photo use.

Video

Two-sided target providing chromatic color chips, skin tone chips and grey reference chips on one side, and a spectrally neutral white balance target on the other side.

Recommended for	Photographers and Bloggers							Filmmakers	
Why do I need it?	Use as a reliable color reference target during the shoot and ensure captured colors are correct. Saves you time in photo/film shooting and editing & ensures predictable color output.
