Description	Ideal for macro photography, a precision colour reference for the tightest or most close up shots.	The original ColorChecker, designed to deliver true-to-life colour reproduction giving photographers and videographers complete control.	A white, grey and black target card to make colour adjustments and grading faster and easier with photo processing or video editing software.	Scientifically engineered to provide a precise, uniform surface that is spectrally neutral in any lighting condition.	18% grey reference scientifically engineered to provide a uniform spectrally neutral surface in all light conditions.	Combining 4 targets and camera calibration software to deliver the most professional-quality colour control possible.	Semi-gloss reference target for creating scanner and camera ICC profiles.	Combines 4 video production targets - colour primaries, white balance, 3-step grayscale, and classic target for video or photo use.	Two-sided target providing chromatic colour chips, skin tone chips and grey reference chips on one side, and a spectrally neutral white balance target on the other side.
Recommended for	Photographers and Bloggers							Filmmakers	
Why do I need it?	Use as a reliable colour reference target during the shoot and ensure captured colours are correct. Saves you time in photo/film shooting and editing & ensures predictable colour output.
